Halden Elite Mesh Office Chair

DYNAMIC LUMBAR SUPPORT & 6D ARMRESTS · OFFICE CHAIR

Halden Elite Mesh Office Chair | Dynamic lumbar support & 6D armrests

For the people who spend the most hours at their desk. Halden adjusts in sixteen ways, so it fits the body rather than the other way round: the backrest moves in height, the lumbar pad follows you as you shift, and the armrests slide, pivot and lift to meet your elbows wherever they land. A moulded seat cushion eases pressure on the thighs while the mesh back keeps the air moving.

• **16 points of adjustment** – including seat depth, backrest height and headrest • **Dynamic lumbar support** – moves with your lower back • **6D armrests** – height, depth, width and angle • **Multi-tilt recline from 90° to 135°** – with lock • **Breathable mesh back, moulded foam seat** – on a polished aluminium base

Our most adjustable chair, for the longest working days.

AVAILABLE OPTIONS
