Frameless LED Sensor Wall Light With Perforated Panel Design

WALL LIGHT

A plaster-in LED step light with no visible frame. The perforated flange is skimmed over with plaster, so only the angled opening shows and the light washes softly down the wall onto stairs, landings and hallway floors. Choose the square or the long version, with or without a motion sensor, in warm or neutral white.

AVAILABLE OPTIONS

Size: Square - 11 x 15 cm (4" x 6"), Long Strip - 10 x 20 cm (4" x 8")

Switch Control: Standard, Sensor

Colour Temperature: Warm light (3000K), Neutral light (4000K)

KEY FEATURES

SIZE
Square 11 x 15 cm or long 10 x 20 cm

SWITCHING
On your wall switch, or with a motion sensor

LIGHT
Integrated 3 W LED, warm 3000K or neutral 4000K

INSTALLATION
Plaster-in: set into the wall and skimmed over

PLASTER-IN, HARDWIRED FITTING

This light connects to a wall light point, not to a socket, and the flange is plastered into the wall. It is easiest to fit during a renovation or when a wall is being re-skimmed; we recommend a qualified electrician. UK wiring colours and step-by-step help are in our installation manual.

DIMENSIONS

Version	Flange	Light opening
Square	11 x 15 cm	6.6 x 6.6 cm

Long	10 x 20 cm	3.8 x 12.5 cm

SPECIFICATION

Type	Plaster-in recessed wall light
Material	Metal (iron), white
Light source	Integrated LED, 3 W
Colour temperature	Warm 3000K or neutral 4000K
Switching	Standard or motion sensor
Voltage	110-240V, covers UK mains (230V)
Remote	No

WHAT'S IN THE PACKAGE

- The wall light, in the colour and size you choose
- Mounting plate or bracket with screws and wall plugs
- Integrated LED, so there is no bulb to buy

QUESTIONS

Do I need an electrician?
Yes. This is a hardwired fitting that connects to an existing light point, so we recommend a qualified electrician. In the UK, fitting a light to an existing point is usually a short job.

Can I fit it into an existing wall?
Yes, but a recess has to be cut for the box and the flange plastered over afterwards, so plan it with your electrician or plasterer.

Is a bulb included?
There is no bulb to buy: the LED is built into the fitting.

Which version should I choose?
The square one gives a wider pool of light on each step; the long one a taller, narrower slot. Step lights are usually set about 20-30 cm above a tread or the floor.
