WHY THE INTERNAL FRAME MATTERS

Most woven baskets sag the moment you fill them, and a sagging basket cannot be stacked or slid onto a shelf. The frame inside these keeps the corners square, so they sit side by side in a cupboard the way a box would — while still looking like something you would leave out on a worktop.

In the bathroom they take towels or toiletries. In a wardrobe they work as quiet organisers for everyday things. Two sizes in one set, so one fits inside the other for storage.
